Docket Navigator

# Docket Navigator Decathlon

Answer Key

1. How many times has the claim term "individual" been construed in a U.S. district court case? What were the definitions and for which cases/patents were they construed?

3	ti	m	ρ	\$
	<b>U</b>		C	3

Answei	A	ns	w	e
--------	---	----	---	---

Overview

- 1. Construed in *Hewlett-Packard, et al v. Gateway Inc* to mean "spaced apart from one another and not joined to one another" (Patent no. 5625532)
- Construed in BASCOM Global Internet Services, Inc. v. AT&T Inc. to mean "separate or discrete" (Patent no. 5987606)
- 3. Construed in *Minton v. NASD, et al* to mean "no restriction or limitation on the identity of the traders" (Patent no. 6014643)

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

Since this question asks for the construction of claim terms and their definitions, we'll use a **Claim Constructions** search. This search type allows you to filter for construed claim terms by judge, jurisdiction, etc. Other aspects of the question can be addressed with **Filters** within a Documents search, as shown in the diagram below.

On the <u>main search page</u>, under the Custom Search section, select a **Claim Constructions** search

#### \*Note: If the Claim Construction search is not visible on your screen, click "Show All Search Types"

#### Custom Search 50 Generate a list of Cases, Documents (or several other Custom Search types) that match the filters you select. Select a Custom Search based on the type of information you are looking for. For example, if you want to see a list of cases involving a company or group of companies select "Cases." If you want to see a list of court orders or pleadings, select "Documents." Select "Show All Search Types" to see other Custom Search options. 2. From Jun. 1st, 2014 - Jun. 1st, 2019, how many U.S. district court decisions have addressed motions for summary judgment asserting patent invalidity based on lack of patentable subject matter under 35 USC § 101? How many of those were granted?

#### Answer 156

#### 156 Decisions - 74 Granted

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

#### Overview

This question is asking for a count of "decisions" (i.e., Orders), so a **Documents** search will provide the answer. Other aspects of the question can be addressed with **Filters** within a Documents search, as shown in the diagram below.

50

3. From Nov. 1st, 2012 - Jun. 1st, 2019, how many rulings on requests for rehearing of an IPR institution decision have there been? How many of those were granted?

#### Answer

#### 1132 Rulings – 41 Granted

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

#### Overview

This question is asking for a count of "rulings" (i.e., Orders), so a **Documents** search will provide the answer. Other aspects of the question can be addressed with **Filters** within a Documents search, as shown in the diagram below. The tricky part of this question is recognizing that a "request for rehearing" of IPR decisions doesn't call for aseparate document type – but rather the *same* document type (*PTAB Institution of Inter Partes Review*) with a *Motion to Reconsider* posture. If you caught that, kudos!

On the <u>main search page</u>, select a **Documents** search

### Custom Search Generate a list of Cases, Documents (or several other Custom Search types) that match the filters you select.

\*Frequent Mistakes: Searching using the "PTAB Rehearing" legal issue instead of the legal posture "Motion to Reconsider."

4. From Jun. 1st, 2014 - Jun. 1st, 2019, how many rulings on original, contested motions to stay pending IPR have there been? What was the percentage of grants for those in 2018?

#### Answer

#### 915 rulings, with a 47% grant rate in 2018

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

#### **Overview**

This question is asking for a count of "rulings" (i.e., Orders), so a **Documents** search will provide the answer. Other aspects of the question can be addressed with **Filters** within a Documents search, as shown in the diagram below. The tricky part is catching that "original, contested motions" means filtering under **Posture of Motion** for "Motion by a Party" and "Emergency" motion types (excluding stipulated, *exparte*, *suasponte* motions, etc. which are not original contested motions). To find the success rates for the motions, create a chart showing those orders broken down by year using **Options**  $\rightarrow$  **Open Analytics**  $\rightarrow$  **Motion Success**.

5. In cases filed from Jun. 1st, 2014 - Jun. 1st, 2019, how many patents has Apple Inc. asserted in U.S. district court cases? Were any found infringed?

#### Answer

#### 16 patents asserted, 0 found infringed.

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

#### **Overview**

This question is asking for a count of patents, so a **Patents** search will provide the answer. Other aspects of the question can be addressed with **Filters** within a Patents search, as shown in the diagram below. The trick here is recognizing that the patents Apple 'has asserted' means searching for Apple as the Patentee. In a Patents search, filters for **Parties** are under the **Advanced Filters** page – just remember to click the drop-down and switch the filter-type to 'Patentees.' Once you add the date and court filters (also on the **Advanced Filters** page), you're all set!

On the main search page, select a Patents search

### **STEP 2 – FILTERS:**

**Overview** 

enter Apple Inc. and select "Patentees" using the dropdown

Using the **Court with Cases Involving Patents** filter, select U.S. District **Courts** 

Using the Case Filing Date filter, enter the relevant dates

## **STEP 3 – VIEW RESULTS**

Click "View 16 Results" to view the search results.

Click Filters → Related Filters → Determinations to view a breakdown of patent Determinations

## 6. What was the PTAB institution success rate for Banner & Witcoff in 2018 when they represented the Patent Owner?

Answer	6 Institutions granted; 4 Institutions denied.
Overview	Since the question is asking about PTAB institution success rates, you might be tempted to use a <b>PTAB Institutions</b> search, or a <b>Documents</b> search for <i>PTAB Institution of</i> While both of those searches will ultimately lead to the right answer, there is quicker solution here: a <b>Motion Success</b> chart. To build a <b>Motion Success</b> chart, start by clicking on the chart-type on the homepage (under Analytics). The trick for the filters is recognizing that the patents Apple 'has asserted' means searching for Apple as the Patentee. In a Patents search, filters for <b>Parties</b> are under the <b>Advanced Filters</b> page – just remember to click the drop-down and switch the filter-type to 'Patentees.'
*Shortcut Alert!*	If you're familiar with our Database, you may recognize that <b>PTAB Institution Success Rates</b> is one of the pre-built charts in the Firm Profiles. You can access that chart with just a few clicks either directly through the <b>Firm Profile</b> , or, starting from an existing binder, you can select that chart tab individually to add to your binder!
	FILTER TYPE OF DOCUMENTSEARCH TYPE MOTION SUCCESSThe question is asking about rulings on institution events, so we'll use a Type of Document filter.Type of Document filter Partes or PTAB Institution of Inter Partes 

#### FILTER FIRMS (PATENTEE FIRMS)

We're looking for institution success for a Firm when they represented a specific type of client (Patent Owner) - we'll need to filter for Banner & Witcoff in the **Firms** filter, and then use the drop down to toggle to **Patentee Firm**.

On the <u>main search page</u>, select a **Motion Success** chart under **Analytics** 

## **STEP 2: FILTERS**

Using the **Firms** filter, enter *Banner & Witcoff* and select "Patentee Firms" using the dropdown

Using the **Posture of Motion** filter, select *Motion by a Party* 

Using the **Type of Document** filter, select *PTAB Institution of* [*IPR/CBM/PGR*]

#### **STEP 3: VIEW RESULTS**

Click "View 69 Results" to view the search results.

\***Protip**: Use the gear icon on the chart to toggle to show percentages

7. For ITC cases that terminated from Jan. 1st, 2014 - Jan. 31st, 2018, what were the accusation outcomes for Finnegan's patent owner clients?

Answer

Overview

## 380 Accusations (breakdown in binder) When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a Patents search. This question is asking for Outcomes of Accusations, so we'll use an Accusations search type. Accusations data is unique Docket Navigator and basically corresponds to the claims in a lawsuit (Accusations) and the resolution of those claims (Outcomes). More complete definitions can be found in our User Guide. Other aspects of the question can be addressed with **Filters** within an Accusation search, as shown in the diagram below. FILTER COURTS ADVANCED FILTER CASE TERMINATION DATE The question is asking about cases in The question is looking for decisions within a the ITC, so we'll use a **Court** filter. In date range, so we'll use a Case Termination this context "court" includes any Date filter. tribunal that resolves disputes. Case Termination Date Courts < January 1, 2014 International Trade Commission For ITC cases that terminated from Jan. 1st, 2014 - Jan. 31st, 2019, what were the accusation outcomes for Finnegan's patent owner clients? SEARCH TYPE ACCUSATIONS FILTER FIRM (PATENTEE) The question is asking for We're looking for outcomes for a specific law firm's clients, so we'll use a Firm filter and accusations/outcomes, so this is an Accusations Search select Patentee Firms. Cases C Docum HIDE SEARCH TYPES + Firms ~ Firms Searches for patent accusations in cases in which the selected FIRMS represented a party. Patentee Firms Searches for patent accusations in cases in which the selected FIRMS represented a party asserting or defending a patent

#### Answer

#### **2009 Cases**

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

Overview

This question is asking for a count of cases, so we'll use a **Cases** search type. To find ANDA cases, filter for cases that contain ANDA pleadings using a **Type of Document** filter. Here, you'll want to select each of the ANDA pleadings that could contain ANDA claims: *Complaint* – *Infringement (ANDA), Complaint* – *Declaratory Judgment (ANDA),* and *Counterclaim* – *Infringement (ANDA)*. This will narrow your results to just cases that contain those documents – i.e., all ANDA cases. From there, just add a quick date filter and you're all set!

On the <u>main search page</u>, select a **Cases** search

#### Custom Search Generate a list of Cases, Documents (or several other Custom Search types) that match the filters you select.

Select a Custom Search based on the type of information you are looking for. For example, if you want to see a list of cases involving a company or group of companies, select "Cases." If you want to see a list of court orders or pleadings, select "Documents." Select "Show All Search Types" to see other Custom Search options.

9. From Jan. 1st, 2014 - Dec. 31st, 2018, how many cases involving Orange Book patents were filed in U.S. district courts?

Answer

#### 2007 Cases

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

Overview

This question is asking for a count of cases, so we'll use a **Cases** search type. Other aspects of the question can be addressed with **Filters** within an Accusations search, as shown in the diagram below. Docket Navigator contains listings of most major patent classification systems (CPC, USPC) as well as PTAB and Orange Book codes all of which can be accessed with a Patent Technologies filter.

10. How many Design patents were asserted in U.S. district court cases filed from Jun. 1st, 2014 - Jun. 1st, 2015? How many of those patents were found infringed?

#### Answer

Overview

#### 381 Patents, 21 Infringed

When converting a real-world question into a Docket Navigator query, the first step is to consider what type of information answers the question. If the question calls for a list of cases, a **Cases** search will provide the answer. If the question calls for a list of patents, use a **Patents** search.

This question is asking for a count of patents, so we'll use a **Patents** search type. Other aspects of the question can be addressed with **Filters** within a Patents search, as shown in the diagram below.

select a Patents search

Custom Search Generate a *list* of Cases, Documents (or several other Custom Search types) that match the filters you select Select a Custom Search based on the type of information you are looking for. For example, if you want to see a list of cases involving a company or group of companies, select "Cases." If you want to see a list of court orders or pleadings, select "Documents." Select "Show All Search Types" to see other Custom Search options. Cases Documents HIDE SEARCH TYPES
